THE DUROC-JERSEY

It seems to be well authenticated that the exact origin or early history of the Red Hog, now recorded as Duroc-Jersey, is not positively known. Many are of the opinion that they are strictly American bred, while we have gathered much information pointing toward stock that was imported at an early date. It is now conceded by all who are interested in this popular breed of swine that there were two families of them in earlier years, one known as Jersey Reds, and the other as Durocs. The name Jersey Red was probably given to this family by Joseph B. Lyman, who at that time resided in New Jersey and was the agricultural editor of the New York Tribune. Previous to this, the breed had been called Red Hogs.

Mr. Lippencott of New Jersey was the first person to advertise these hogs as Jersey Reds. We find in Clark Pettit's History of Jersey Reds, that in the year 1832 there was a pair of red pigs shipped from England to Salem, N. J., and he says: "Their unique color rendered them objects of special interest in a locality long noted for successful swine breeders and feeders, among whom had long existed a great spirit of rivalry as to whom should annually win the honor of raising the best lot of hogs, making the greatest average weight at different ages, for which prominent Philadelphia butchers paid advanced prices." The Duroc family of Red Hogs were so called by Isaac Frink, a farmer living in the town of Milton, Saratoga county, N. Y. In the spring of 1832 Mr. Frink took a mare to a noted stallion, Duroc, then owned by Harry Kelsey, in the town of Florida, N. Y., about twenty-five miles away, and he saw a litter of ten red pigs, the production of a pair of red pigs brought here by Mr. Kelsey from Oyster Bay, N. Y., or imported by him from England. He moved from Oyster Bay to Florida. In regard to the importation of the pigs, the history is not authentic, although Mr. Kelsey told Mr. Frink that they were imported, but the term imported may have been improperly used, as is often the case, even at this late date. The production of these pigs was much sought after, and assumed the name of Mr. Kelsey's famous stallion, and spread all through the New England states, becoming very popular on account of their great qualities. In 1830 William Ensign of Wilbur's Basin, in the town of Stillwater, brought a pair of red hogs from Connecticut and in the next year he got a few more from the same place. He bred and sold them far and near. The Frink and Ensign families of Red Hogs were crossed and bred to advantage, and have been bred ever since with more or less effort toward keeping them thoroughbred, but no model or type was followed except individual ones. These hogs, according to what information we can get, possessed more of the character of the Jersey Red family, except that they were not so large and were rather finer boned. Thomas Bennett of Rossville, Ill., through correspondence with the Honorable Cassius N. Clay of White Hall, Ky., the honorable gentleman says "that the Spanish hogs were imported by Honorable J. B. Clay, from Spain or Portugal, when minister to Lisbon, under Zachary Taylor in 1850. He gave me a pair of the progeny of which I widely distributed." About the year 1882 the first association was organized to perpetuate the records of the Duroc, while in 1891 the National Association was organized and incorporated, with J. M. Stonebraker as president and J. W. Phillippo as secretary. On April 10, 1893, the resignation of Mr. Phillippo as secretary was accepted and Robert J. Evans was elected secretary, remaining such until June 8, 1906, when H. C. Sheldon was elected, and remained secretary until December 2, 1909, when the present secretary was elected.

No characteristic of our breed is more pronounced at the present time or perhaps no other has been of so much value to our breed in making them popular as that of being prolific. Years ago, when our breed was in its infancy, breeders of other breeds turned to us on account of the great prolificacy of the Duroc sows. The conformation of our breed has been greatly improved with recent years, but this improvement has been brought about without sacrificing any of the prolificacy. In fact, our records show that the Duroc sows

are more prolific today than they were twenty years ago. Out of a record of 4,800 litters in Volume No. 44 of our Herd Book, they show an average of 9.43 pigs to the litter. In fact, some criticize our breed on account of the sows farrowing larger litters than it is possible for the sow to raise. We think this is a very good criticism. Recent reports from one of the leading agricultural experiment stations states that thirteen Duroc sows farrowed 132 live pigs, raising 101 of them, a much larger average than did any of the other breeds owned by this college. The excessive hardness of our breed is one of the characteristics conceded to us by most raisers of other breeds of hogs. The pigs when farrowed are exceedingly strong and active and so are able to withstand many hardships that animals of weaker constitutions could not withstand. It is a very common occurrence for a Duroc sow to raise ten strong pigs at a litter. The feeding qualities of our breed are one of our most boasted assets. The Michigan Agricultural College makes us a table showing that for 4.65 pounds of grain fed to Durocs they produced a gain of 2.59 pounds per day for 168 days, and the animals at the close of the said period were showing splendid gains and gave promise that they could make similar gains for an extended period of time, while the closest breed compared showed 5.22 pounds of grain for 2.11 pounds of gain. Owing to the conformation and hardness of our breed they are capable of making profitable gains where animals of other breeds would not be profitable, on account of our animals being able to convert into pork more grasses and rough feed than most other breeds.

In the conformation of the Duroc there is everything that is for the purpose of converting grains and grasses into pork. They have good feet, short pasterns, heavy bone, all necessary to carry the animal to market or to carry it about the farm, gathering up the waste feeds, which otherwise would be lost. His high arched back, his large heart girth and wide spring of ribs give room for the development of the organs that will convert grains and grasses into pork. The broad head indicates nerve power and feeding type, with bright eye and an ear not too large, allows the animal to rustle in the feed lots and in the pasture to good advantage.

The above characteristics adapt the Duroc for any locality. In the far north of Canada he converts the small grain into as high-grade pork as any breed, with a much larger per cent of profit. He is proving a favorite in the hills of New England on account of his ruggedness and power to convert their by-products into fancy hams and premium bacon. No part of the country has afforded him such a welcome as the far South, where the cotton and sugar cane planters are fast becoming producers of pork, and the Duroc has proven that he will withstand the severe heat and convert the alfalfa, peanuts, oats and wheat into pork for the Fort Worth market, with a handsome return for labor and capital invested. Across the Rocky mountains the alfalfa and small grain farmers are fast realizing that the Duroc can be raised with a handsome profit on the crops they raise, saving them the expense of shipping thousands of head each year from the corn belt to supply their markets.

The interest in Durocs does not stop with our border, but extends into Australia and South American countries, which are only in their infancy as to producing pork. The present popularity of our breed, which includes, on good authority, 75 per cent of the hogs raised, is due to the fact that our breed has proven profitable to the farmer. The farmer raises the kind of hogs that are most profitable to him in the majority of cases. He demands an animal with constitution sufficient to withstand the ordinary conditions which surround him, and at the same time be able to convert the products of his farm into pork at a profit. In addition to raising a large litter of pigs, a young Duroc sow will make a splendid growth, so that when the litter is weaned she can be easily finished for the market. It is quite a compliment to a feeder to be able to top the market when his hogs are sold, but many times the market-topping animals are not the animals produced at the most profit to the farmer. On account of the ruggedness and capacity for handling rough feed, the Duroc makes splendid growth at an early age. The engine in the hog which converts grain and grasses into pork is largely ofial at the abattoir, but by breeding an animal with a smaller engine you decrease the capacity for converting large quantities of rough feed into pork, and thus reduce the profit on the animal. At the recent International Live Stock Show it was very noticeable in the class

for grand champion, the Duroc barrow of practically the same age as his competitors was at least 200 pounds the heavier, which on the scales that day would have meant at least \$16.00 more value. Farmers are raising hogs for the money they will bring and the Duroc has proven on all occasions his ability to produce pork at a profit.

Following is the report of the president:

PRESIDENT'S ANNUAL ADDRESS.

Again the month of December is with us as a reminder of another anniversary, and that one more year has been added to the age of our association, and as the presiding officer of the association, I look back over the year of 1914 with a certain feeling of pride. While I do not know just what our treasurer's report will show, but this undoubtedly has been one of the most successful years of the association.

We are today the leading swine record association of the world. Why should we not be? The DUROC-JERSEY is the hog that converts the farmer's grain into profitable pork. He it is that graces the show ring so successfully. He it is that forces himself into prominence all over the United States and Canada.

After being elected to the presidency last December I made my first official visit to our offices, and found that the floor space was inadequate to meet the requirements for handling the business to the best advantage; consequently the office was removed to 631, 632, 633 Jefferson Building, where we have a home that fully meets the present demands of the office.

During my term of office I have kept in close touch with the work being done in the office of the association, and I have instructed our secretary, Mr. Pfander, to put on such additional office help from time to time as was neces-

sary; and I wish to say here that now the work is conducted in such a way that pedigrees received at the office in the morning are recorded and returned the evening of the same day, and I, as president, wish to commend the secretary and treasurer on the clear and concise manner in which the books of the association have been kept.

The executive board and board of directors have transacted such business as has come before their respective offices in a very harmonious and satisfactory manner, and I am glad to say that at this time the stock of the National Duroc-Jersey Record Association is worth one hundred (100) cents on the dollar. This is the FIRST time in the history of the association this statement could be truthfully made.

The capital stock on December 1, 1909, was worth forty cents on the dollar. Our capital stock today, December 1, 1914, is worth a full hundred cents on the dollar, and I wish every stockholder would pay particular attention to the treasurer's report at this meeting. It will contain information which is not only your privilege, but your duty to know. From this time on it will be the purpose of the management of this association to be more liberal in offering premiums at the Duroc shows. We should offer assistance to the Duroc shows, especially in the newer fields, and the money should be placed so as to create the greatest interests. This can better be done, in my estimation, by offering more prizes in the classes instead of hanging the money in large purses on one or two classes.

I had the pleasure of attending the Texas State Fair at Dallas this year, it being the judgment of the board of directors to send me as the representative of the association, and I wish to say, while Texas raises lots of hogs, the hog industry of that state is just in its infancy.

The Duroc-Jersey is well adapted to the needs and conditions of the Southwest, and if we are alive to our interests we will make wonderful strides there in the near future.

I found at Dallas a good number of creditable Durocs, and that the Durocs shown there were superior in individuality to those of the other breeds of swine, and that the boys at Dallas were the most royal set it has ever been my pleasure to meet on a fair ground.

I think 1914 should be recorded as a successful year for Durocs and Duroc breeders, and it is my ambition to make the year to come more successful. This can be done by concerted effort, with an eye ever open to the interests of the Red Hog.

I wish to thank the members of the association for the honor and confidence bestowed upon me at our regular meeting one year ago, and would say my relations with the officers and members of the association have been the most pleasant.

Again thanking you for your support and hoping for a continuance of your support, I wish you a happy and prosperous New Year.

G. W. HOCKETT.

On motion by H. S. Allen, seconded by Geo. M. Klusmire, the report of the president was accepted.

Following is the report of the secretary:

On motion by DeVere Rafter, seconded by F. S. Vanderhyde, the report of the treasurer was accepted.

Following is the report of the executive committee:

Peoria, Ill., November 30, 1914.

To the Stockholders of the National Duroc-Jersey Record Association:

Your committee submits to you the following report for the year beginning December 1, 1913, and ending November 30, 1914:

We have examined the books and reports of the secretary and the treasurer and find that they agree as follows:

The secretary received from all sources \$29,686.72, which amount has been turned over to the treasurer as shown by his statement.

During the year the secretary has drawn warrants to the amount of \$19,037.26, and of this amount warrants to the amount of \$2,943.79 are not as yet presented for payment.

We find that on December 1, 1913, the treasurer had on hand \$37,045.40. This amount, plus the receipts as shown by the secretary, \$29,686.72, and interest on farm loans to the amount of \$1,517.40, and interest on daily balances \$88.09, making a total of \$68,337.61, minus warrants paid, \$18,234.29, leaves us a balance with the treasurer on November 30, 1914, of \$50,103.32.

This amount agrees with the books of the treasurer and includes the following items:

Deposited in Citizens State Bank, Blair, Neb.....	\$ 421.66
Deposited in Plateau Bank of Herman, Neb.....	2,137.82
Secretary's check for October, 1914, business.....	3,081.09
Secretary's check for November, 1914, business.....	2,762.75
Amount invested in farm loans.....	41,700.00
Interest earned on loans, but not due.....	752.90
Invoice of property in office at Peoria, Ill.....	3,323.10

Total	\$54,179.32
From this amount deducting the unpaid warrants.....	2,943.79

	\$51,235.53
And cost of printing 11,180 pedigrees in Volume 47.....	1,772.00

Leaves the net worth of our association today.....	\$49,463.53
Our net worth last year as shown by reports submitted was.....	36,604.39

Which shows a gain of more than our last year's report.....	\$12,859.14
This year we sold capital stock to the amount of.....	5,240.00

Leaving us net profits exclusive of the sale of capital stock for the year	\$ 7,619.14
--	-------------

There are several items of minor importance, including some unpaid premiums for 1914, that are not accounted for in the above report.

We wish to especially call the attention of the stockholders to the fact as shown by the above report that the net worth of the association today exceeds the amount of our capital stock.

(Signed) W. A. WILLIAMS,
J. W. CLATTERBUCK,
C. F. BURKE.

On motion by H. Smith, seconded by J. J. McLain, the report of the executive committee was accepted.

DeVere Rafter offered the following amendments to the Articles of Incorporation, and on motion, seconded by Geo. M. Klusmire, the adoption of Article VI as amended was moved.

Motion by J. Young Caldwell, seconded by E. H. Parker, to table the motion was lost by a vote of thirty-one to seven hundred fifty-one.

With the consent of the second DeVere Rafter withdrew his motion to amend Article VI and other articles and substituted the following motion:

"That we amend Articles VIII and IX of our Articles of Incorporation to read as follows:

ARTICLE VIII.

Mr. D. O. Also asked that we submit to him the classification of the premiums offered by this association and our recommendation for judge at the Panama-Pacific Exposition.

The following charges were filed with the board of directors, who after hearing the evidence offered by the prosecution, that had been furnished by J. J. McLain, Anna, Texas, at the order of President Hockett, the board took a recess, to meet in Chicago, Ill., Nov. 30, 1914, at which time and place Mr. J. C. Hestand, the accused, appeared before the board and offered his defense in person and by affidavits.

CHARGES.

Mr. J. R. Pfander,
Peoria, Ill.

Dear Sir:—I hereby state that during the fall of 1912 that I entered into partnership in Duroc-Jersey hog business with J. C. Hestand, and that later five sows, namely, Kute 242472, Minnie 217936, Home 245100, Alice 228806, Luck 194198, got in pig unbeknown to me, and by boars other than our herd boars, whose names were Joe 125597, Wulf 129437, Wilson 130451.

And that I called Mr. Hestand's attention to the fact and he said we would make meat of the pigs. But that Mr. Hestand did knowingly and willfully fraudulently pedigree said pigs of unknown sire, and sold said pigs as breeders, and I do hereby respectfully ask that your board of directors do investigate said charge at earliest date convenient.

Yours sincerely,

G. T. BRANHAM.

On motion by H. Smith, seconded by R. L. Comer, the following motion was carried: "That we, the board of directors, do find from the evidence presented to us on the charge preferred by G. T. Branham against J. C. Hestand, that J. C. Hestand is not guilty as charged, and do exonerate him of said charge."

The vote was taken on this matter by sealed ballot, resulting in five votes for acquittal and one for conviction.

On motion by R. L. Comer, seconded by Klusmire, the board adjourned.
